KINGDOM OF SAUDI ARABIA

ABOUT

INPHEX - 2019 is a full-fledged pharma exhibition and conference covering all sectors of the pharma industry. INPHEX is one of the largest and the first of its kind event in the Middle East and North Africa.

www.inphex.com

SAUDI INPHEX

Saudi Arabia is the fastest growing pharma market in the MENA region. The Saudi government has played an active role in supporting many pharma industries that are coming up with state of the art plants in the country. The industry is growing at a very fast rate to cater to the healthcare needs of its citizens by indigenously manufacturing the pharmaceutical products to achieve Vision 2030.

WHY VISIT INPHEX

INPHEX is an international exhibition for pharmaceuticals, pharma machinery, lab equipment, ingredients and all the supporting industries. All the exhibitors can showcase the latest products and services which will help them to increase business in their region. We will have exhibitors and visitors from more than 15 countries thus creating a great opportunity to network and trade. INPHEX will also be organizing very interesting seminars covering the most trending topics.

BOOK A STAND

PHARMA MACHINERY

Pharmaceutical equipment industry is constantly improving the technology that will enable higher production with quality. The global pharmaceutical giants find it increasingly necessary to not only offer affordable medicines, but make them accessible to the MENA region.

Exhibitions pose an excellent opportunity to exhibit your advancement and let the world see what it is fit for delivering. The machineries on display will include, encapsulation, tableting, blister packing and cartoning. Stroll through an assortment of machine advancements to look at and pick what best suits your industry prerequisite to keep you ahead in the universal market. Machine producers from Asia, Middle East, Africa and Europe will be attending to explore their chance to work with potential buyers. Visit INPHEX to meet potential makers and buyers.

LABORATORY EQUIPMENT

Researchers have more access to equipment and a greater ability to collaborate than ever before. By embracing advancements in laboratory automation and through adopting environmental strategies, scientists are able to streamline procedures and cut costs. These advancements are growing in popularity, meaning results are obtained faster, more efficiently, and cost-effectively.

The pharmaceutical and biotechnology enterprises have driven automation and additionally profit by it. Drug discovery units, specifically, have led the pack in automating and robotizing their research laboratories.

Find your equipment of choice from drug discovery to clinical use. Automation of lab supplies is what you need to produce precise and faster outcomes. Take a visit in the laboratory equipment zone to

discover what's new. Exhibitors will walk you through a demo on how it functions and how it can benefit your research. The R&D department can embrace cleverly planned lab wares and promote automation. Adopt smaller lab equipment, using cloud innovation, automation of lab equipment, and sustainable options for your lab wares.

INGREDIENTS

Active Pharmaceutical Ingredients (API) are active constituents used in the manufacturing of pharmaceutical formulations and has pharmacological and therapeutic effects on the body. Expanding predominance of chronic diseases is relied upon to boost the Active pharmaceutical ingredients

market over the estimated time frame. The expanding commonness of chronic diseases is expected to build the demand for drugs, thus fuelling the Active pharmaceutical ingredients market in the near future.

Pursue advanced manufacturing strategies, discover technical advancements and capacities of API for your project. Distinguish the best API for your undertaking. Discover extraction expertise, purification expertise and chemical expertise. Investigate distinctive raw material providers for your blockbuster medication. Discover the cost of your aggressive API's and find out about alternative manufacturing practices.

Finished Dosage Formulations

Dosage forms (also called unit doses) are pharmaceutical drug products in the form in which they are marketed for use, with a particular blend of active ingredients and inactive components (excipients), in a specific configuration, and allocated into a specific dosage. Different sorts of dosage forms include solid dosage, liquid dosage and semi-solid dosage and gaseous dosage forms. FDF is one of the quickest developing in the Pharma Industry.

Finished Dosage Formulation (FDF) zone will be the worldwide pharma stage, devoted to manufacturing, development and supply of finished dosage forms.

Get an access to the key innovations for generic and patented formulations including spray drying, micronisation, hot melt extrusion and

nanoformulations which enable the creation of more advanced, bioavailable and patient-friendly combinations. INPHEX creates an open opportunity to dossier specialists, item merchants and formulation companies, to discover new collaborations.

Primary and Secondary Packaging

The pharmaceutical packaging market is continually progressing and has encountered yearly development of no less than five percent for every annum in a previous couple of years. Distribution of products is presently more worldwide than any time in recent memory. Mass customization of packaging to allow its utilization in numerous business sectors is a point that needs exposition and discussion.

INPHEX provides a chance to investigate fine print serialization strategies, biological drug formulation packaging, and prefilled syringe packaging which has dependably been a challenge always. What's more, to address all your pharma packaging needs, this exhibition embraces the most imaginative innovation for your

packaging line.

technically guide them with their business.

Face to Face meet is essential before you settle on the greater and vital choices for your business. Talk about, discuss, brainstorm, analyze and pick the best individuals to work with.

INPHEX participants incorporate Top Management, CEO's and Decision-Makers, Middle Management and Pharma Professionals, Policy Makers, Diplomats and Foreign Commercial Corporations, Scientists and R&D Professionals, Regulatory Professionals, Product Managers, Purchase Managers, Officers and different experts, Equipment Suppliers and Distributors, Business Development, Sales and Marketing experts, Doctors and Healthcare experts, Medical Representatives, Pharmacists and Para Medical Professionals, Hospital Administrators, Academicians, Teachers and Students.

CONSULTANTS

Discover your preferred experts for your Pharmaceutical task outline, according to administrative prerequisites of SFDA, USFDA, MHRA, TGA, WHO, GMP or to outline your plant development. Meet Design experts and turnkey specialists from across the nations for your venture. Top administratives, CEO's and leaders are searching for experts to

SEMINAR

Seminars will cover the most interesting and trending topics of the year.

- Intellectual Property Rights
- Current Trends in Packaging Technology
- Regulatory and Data Security in Pharma
- Personalized Medicine and Customization
- 3D Printing in Pharma
- Artificial Intelligence and Cognitive Computers

**BOOK SEMINAR
PASSES**

AUDIENCE

25 - 30% of INPHEX visitors hold top management positions with the ability to take part in investment decisions

- Top management
- CEOs and decision makers
- Business development, sales and marketing
- Product managers
- Doctors and healthcare professionals
- Academicians and students

TOP REASONS TO ATTEND INPHEX

- New business opportunities
- Network with more than 5000+ visitors
- Increase Middle East pharma trading
- Explore future technologies
- Exhibitors and visitors from more than 15 countries
